PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building business web applications with Angular, React, Next.js, TypeScript, and JavaScript. Experienced in responsive UI development, reusable component systems, complex forms, data tables, state management, and REST API integration. Comfortable working with Node.js, Express.js, authentication, and SQL or NoSQL databases when a feature requires end-to-end ownership.

TECHNICAL SKILLS

Frontend: Angular, React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Angular Material, Bootstrap

UI Engineering: Responsive Design, Component Architecture, State Management, Reactive Forms, Data Tables, Accessibility, Cross-Browser Compatibility

Backend & Data: Node.js, Express.js, REST APIs, JWT, OAuth, RBAC, MongoDB, MySQL, PostgreSQL, Third-Party and LLM Integrations

Tools & Delivery: Git, GitHub, Docker, CI/CD, AWS, Vercel, Netlify, Nginx, Linux, Agile, Scrum, Code Reviews, Performance Optimization

PROFESSIONAL EXPERIENCE

Qutham Technologies | *Bahawalpur, Pakistan*

Frontend Developer

Jun 2023 - Jul 2026

- Built and maintained frontend modules for enterprise dashboards, retail systems, healthcare platforms, marketplaces, and internal tools using Angular, React, Next.js, and TypeScript.
- Turned product requirements and design references into responsive pages, reusable components, multi-step forms, data tables, reports, and approval workflows.
- Integrated REST APIs and handled authentication, role-based access, validation, loading, error, and empty states across customer-facing and administrative interfaces.
- Worked with Node.js and Express.js services and with MongoDB, MySQL, or PostgreSQL when features required backend changes or end-to-end troubleshooting.
- Improved performance and maintainability through lazy loading, code splitting, component refactoring, reusable services, and practical debugging.
- Collaborated with designers, backend engineers, QA, and stakeholders during estimation, implementation, testing, release, and production support.

Khan Technologies | *Bahawalpur, Pakistan*

Frontend Developer Intern

Feb 2022 - Jul 2022

- Built responsive screens and reusable UI components with Angular, React, JavaScript, HTML, CSS, and Bootstrap during a six-month internship.
- Connected REST APIs, fixed layout and browser issues, and worked with Git and code review under senior developer guidance.

SELECTED WORK

StoreOS | *Retail Operations Platform*

2025

- Built responsive point-of-sale and back-office screens for sales, inventory, goods receipts, register sessions, role-based access, reporting, and accounting workflows.
- Worked across API and database integrations so stock, transactions, permissions, and reporting data stayed consistent from checkout through administration.

Retail Management System (EPM) | *Multi-Location Reporting Platform*

2024

- Developed dashboards and reporting screens that gave teams a clear view of inventory, sales, and store performance across multiple locations.
- Turned dense tables, filters, and reporting workflows into reusable responsive patterns that remained practical on smaller screens and easier for teams to navigate.

Hospital Management System | *Healthcare Operations Platform*

2024

- Built interfaces for patient records, appointments, billing, staff, and departmental administration, with role-based access for clinical and non-clinical users.

- Created reusable forms, tables, and API states for data-heavy workflows, with careful handling of validation, permissions, and clear navigation.

Davico | *Car Rental Platform*

2023

- Delivered customer and admin flows for vehicle discovery, availability, bookings, pricing, and day-to-day fleet management.
- Integrated availability and pricing APIs into reusable components, then built operational screens for vehicles, reservations, schedules, and rate updates.

Classified Marketplace Platform | *Listings and Messaging*

2023

- Built a mobile-first marketplace with category browsing, search and filters, image-based listings, authentication, user profiles, and direct messaging.
- Developed reusable listing and detail components and connected REST APIs for posting, browsing, account, and messaging flows across desktop and mobile.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science | The Islamia University of Bahawalpur | 2026

Certifications: Back End Development and APIs; JavaScript Algorithms and Data Structures - freeCodeCamp
