PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building and shipping production-grade web applications across the MERN and MEAN stacks. Skilled in Angular, React, Next.js, TypeScript, Node.js, Express.js, REST APIs, and relational and NoSQL databases, with hands-on experience delivering responsive interfaces, secure backend services, authentication, third-party integrations, and scalable application architecture. Experienced across the complete development lifecycle, from requirements analysis and UI implementation through API integration, deployment, performance optimization, and production support.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Angular, Angular Material, Tailwind CSS, Bootstrap, Responsive UI, Component Architecture

Backend & APIs: Node.js, Express.js, REST APIs, JWT, OAuth, MVC Architecture, Third-Party API Integration, LLM/AI Integration

Databases & Cloud: MongoDB, MySQL, PostgreSQL, Docker, AWS, Git, GitHub, CI/CD, Vercel, Netlify, Nginx, Linux

Practices: Agile, Scrum, Clean Code, Code Reviews, Debugging, Performance Optimization, Cross-Functional Collaboration

WORK EXPERIENCE

Khan Technologies | Bahawalpur, Pakistan

Frontend Developer Intern

2021

- Built responsive client-facing UI screens across Angular and React using HTML5, CSS3, Bootstrap, and JavaScript under senior developer guidance.
- Integrated REST APIs into frontend interfaces and strengthened core engineering practices in component-based development, debugging, and Git workflows.

Qutham Technologies | Bahawalpur, Pakistan

Full-Stack Developer

Jan 2023 - Jul 2026

- Shipped full-stack products - including CRMs, admin dashboards, and reporting systems - using Angular, React, Next.js, TypeScript, Node.js, Express.js, and MongoDB.
- Built and maintained production modules across enterprise applications: role-based dashboards, multi-step forms, data-heavy tables, and approval workflows.
- Integrated REST API endpoints with JWT/OAuth authentication and role-based access control for secure, reliable data flow across frontend and backend.
- Implemented AI/LLM-enabled features for automation, summarization, and internal productivity tooling.
- Improved application performance and maintainability through lazy loading, code splitting, bundle optimization, and reusable component architecture.
- Coordinated production releases end-to-end - from requirements through deployment and post-release support - collaborating with designers, backend engineers, and stakeholders.

Frontend Developer

Jan 2022 - Dec 2022

- Converted design references into pixel-perfect, responsive UI screens across client applications using React, Angular, and Tailwind CSS.
- Built reusable, cross-browser-consistent component libraries that streamlined screen development and preserved design fidelity.
- Partnered directly with designers to resolve spacing, typography, and layout details ahead of backend integration.

Software Engineering Intern

Jul 2021 - Dec 2021

- Supported senior engineers on enterprise application modules, gaining hands-on exposure to component-based frontend development and REST API integration.
- Contributed UI features and fixes under code review, strengthening debugging skills and professional Git workflows.

PROJECTS

Flash Exchange Clone | Currency & Digital Asset Exchange Platform

2026

- Developed a responsive exchange platform featuring live rate displays, structured market information, secure authentication, and streamlined currency and digital-asset transaction workflows.
- Recreated the reference product's interface and interaction patterns through reusable components, API-driven data updates, robust validation, and consistent behavior across desktop and mobile devices.

Personal Portfolio | Next.js Technical Portfolio & Case-Study Website

2026

- Built and deployed a responsive Next.js portfolio that presents production work, technical capabilities, and project case studies through a polished, component-driven interface.
- Optimized the site for performance, responsive behavior, maintainable content presentation, and reliable deployment on Vercel.

Aurum Technologies Website | *Freelance Corporate Website*

2025

- Designed and developed a premium, responsive technology-company website that translates brand positioning, services, and project capabilities into a polished, conversion-focused digital experience.
- Implemented advanced scroll-driven interactions, animated service and project cards, marquees, SVG motion, mobile-specific stacked-card transitions, and a maintainable Next.js component architecture.

Innovative Tech Website | *Freelance Corporate Website*

2025

- Designed and delivered a modern, responsive corporate website that presents the company's technology services, capabilities, and brand positioning through a clear, professional, conversion-focused user experience.
- Built reusable interface components, responsive page structures, optimized media, lead-generation contact flows, and an SEO-ready production architecture for consistent performance across desktop and mobile devices.

StoreOS | *POS, Inventory & Accounting Product*

2025

- Architected a full-featured retail suite covering point-of-sale operations, inventory control, goods receipt note flows, role-based access, and operational reporting.
- Modeled accounting workflows including chart of accounts, journal entries, and relational business data, with an architecture designed for maintainability and future productization.

Retail Management System (EPM) | *Enterprise Retail Performance & Reporting System*

2024

- Created a centralized platform for inventory visibility, sales performance monitoring, and cross-location operational reporting across retail environments.
- Delivered structured dashboards and reporting workflows that help teams track business activity, review performance data, and manage distributed operations efficiently.

Hospital Management System | *Multi-Department Healthcare Operations Platform*

2024

- Built a role-based system for patient records, appointment scheduling, billing, staff administration, and coordinated workflows across multiple hospital departments.
- Implemented secure data access patterns, reusable management interfaces, and data-heavy operational screens designed for clinical and administrative users.

Davico | *Car Rental Platform & Administrative Console*

2023

- Developed an end-to-end vehicle rental experience covering fleet discovery, availability scheduling, reservation workflows, and pricing visibility for customers.
- Built an operational admin panel for managing vehicles, bookings, availability, and pricing through structured dashboards and role-aware management workflows.

Dubbizle Clone | *Full-Stack Classifieds & Marketplace Platform*

2023

- Engineered a mobile-first MERN marketplace with structured category listings, advanced search and filtering, image-based advertisements, secure authentication, and direct user-to-user messaging.
- Designed reusable frontend components and modular REST API workflows to support scalable listing management, responsive browsing, and consistent cross-device interactions.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science - The Islamia University of Bahawalpur (Completed)

Certifications: Back End Development and APIs; JavaScript Algorithms and Data Structures - freeCodeCamp
